

Audit Log

The Audit Log provides a comprehensive, unfiltered record of activities tracked within the system. Unlike other activity lists where access is restricted based on user permissions, this log displays all events for full transparency.

Features:

- **Event Filters:** Narrow down the log by applying filters such as:
 - **Date Range:** Specify a "From" and "To" date for targeted searches.
 - **User:** Filter activities by a specific user.
 - **IP Address:** Locate actions originating from a particular IP address.
- **Sorting Options:** Organize the log by any of the available columns, including:
 - **Activity Date** (default)
 - **User**
 - **Event**
 - **Related Item or Detail**
 - **IP Address**

Audit Log

This audit log displays a list of activities tracked in the system. This list is unfiltered unlike similar activity lists in the system where permission filters are applied.

Event Filter		Date Range From	Date Range To	User	IP Address
No Filter		mm/dd/yyyy	mm/dd/yyyy	No user selected	

Sort

Activity Date
