

Customizations

This platform offers a range of customization options to tailor the website to your organization's branding and workflow needs. These settings can be accessed under **Settings** → **Customizations**, where you can:

- **Upload Your Logo:** Personalize the site by adding your organization's logo for a branded experience.
- **Adjust Website Colors:** Customize the website's appearance with distinct night and daytime color schemes to enhance usability and visual appeal.
- **Set a Default Landing Page:** Decide what users see when they first access the site. Options include:
 - Displaying a Delegation of Practice statement to ensure all users acknowledge it upon login.
 - Directing users to the first page of your guidelines for immediate access to critical information.

The screenshot shows the 'Customization' settings page. At the top, there is a navigation bar with links for Settings, Maintenance, Audit Log, Users, Roles, and Webhooks. On the left, a sidebar contains 'Categories' with 'Features & Security' and 'Customization' (selected), and 'System Version' showing 'Swift Protocols v11.2.1' and 'License Details'. The main content area is titled 'Customization' and contains several sections:

- Organization Name:** A text input field containing 'Swift Protocols'. Below it is a checkbox labeled 'Show name in header' which is checked.
- Default Page Editor:** A dropdown menu currently set to 'WYSIWYG'.
- Organization Logo:** A description of the logo's use, a preview image, and a 'Select Image' button with 'Reset' and 'Remove' options below it.
- Organization Icon:** A description of the icon's use, a preview image, and a 'Select Image' button with a 'Reset' option below it.
- Application Color Scheme:** A section for setting colors for the application user interface, with a note that colors can be configured for dark and light modes.
